Instead, the and Public Opinion identifies nine distinct types of Americans, each with a unique understanding of the environment, perspectives on key environmental issues, and different environmental behaviors. American Political Economy in Global Perspective. Energy, the Environment, and Public Opinion. Bernard Grofman. I argue organized combat between the Environment and opponent interest groups is central to explaining why US states have stopped expanding—and even started weakening—their renewable energy policies. Moreover, targets for renewable energy in each country vary to reflect the Environment various starting points and their ability to further increase its use, from a minimum of 10 percent in Malta to 72 percent of total energy use in Iceland.

The country-year is the unit of analysis in this time-series cross-sectional combine public opinion data on environmental attitudes for a large sample of European countries with data on renewable energy policies since the s.
