It is easy and mindless. You Do Not Have To Be A Genius If you were given a random list of numbers, at the rate of one per second, how many could you remember after a pause of 20 seconds? Colvin tries to make his point as clear and sharp as possible.

High repetition is the most important difference between deliberate practice and random practice. Better performance, and maybe even world-class performance, is closer than you think. Too much experience within a field may restrict creativity because you know so well how things should be done that you are unable to escape to come up with new ideas. The truth is that it comes with a lot of practice. For example: 1. There were, inevitably, parts where Colvin got lost in the weeds. this basic framework for thinking about practice, we need to

look at the practice. I am keen to work out whether we can design coding dojo sessions to be about deliberately practicing in a certain area.
