The government is a major object of analysis in macroeconomics—for example, studying the role it plays in contributing to overall economic growth or fighting inflation. The goal of this course is to better understand the microeconomic foundations of development issues in poor countries, The Microeconomic Growth a particular focus on sub-Saharan Africa. The same cannot be said of macroeconomics—where there are, and have been, competing schools of thought about how to explain the behavior of economic aggregates.

Microeconomic theory typically begins with the study of a single rational agent. Economics is concerned with the well-being of all people, including those with jobs and those without jobs, as well as those with high incomes and those with low incomes. But for poorer countries, the opposite is typically true. Labour's Share of Growth in Income and Prosperity. A good example would be that the cost of not eating the chocolate is higher than the benefits of eating the waffles, it makes no sense to choose waffles.
