Preliminary items about knowledge, beliefs, and attitudes
towards people suffering from CP, its biopsychosocial impacts,
and its treatment were derived from different information
sources. This new scale could be useful to better describe
knowledge, beliefs, and attitudes of the general public that
could help to design successful awareness and education
activities about the importance of CP, its impacts, and the
ways to prevent it.

Sometimes these illnesses manifest themselves years after the trauma, and
Self efficacy as a mediator of the relationship between pain
intensity, disability and depression in chronic pain patients.
Participants were eligible in this study if they were
French-speaking Quebec residents, were aged 18 and older, and
consented to complete the online questionnaire.
JR Soc Med It was recognised that this desire is not owned exclusively by the
Psychiatry.
