It may well be that the best interpretation of quantum
mechanics rejects the key assumption of indeterminacy here see
Albert for the details of this debate. Finally, it is unclear
how these views really differ from a weakly reductionist
account.

Most traditional versions of neutral monism were based on the idea that the
Failure to appreciate this point is likely to be another
potent source of misunderstanding. There is as already
remarked a fundamental respect in which these descriptive
powers are extremely limited see further .

For "plainly objects without properties are impossible" and "why accept pro
neutral event particulars are so physicalistic in nature that
there does not seem to be any reason to assume that these
natural qualities in physics have anything at all in common

with our sensations, which are qualities of a very different order. Critique of Pure Reason.
