However, there are still serious unresolved scientific problems to overcome before the move to clinical use. Novo Nordisk is keeping the focus on the ethical issues related to stem cell research and continues to follow the ethical debate around the world. The different types of SC differ in their origin, potential to generate various tissue and adverse effects when used in living organisms.

ThesecellshavepropertiesverysimilartohEScells. This view holds that only the very beginning of embryonic life can serve as a reasonable boundary line in assessing the moral worth of a human organism, because it is the moment marked out by nature for the first visible appearance in the world of a new individual. For example, there is a report of a child in Moscow, Russia, with a brain tumor after being injected with fetal neural stem cells in the cerebrospinal fluid Amariglio,

; Macready,

Buratovich, Michael A. The main ethical issue in obtaining human ESC is the use of
Cells?
