If those with a proprietary and vested interest in the standard are engaged at the beginning, and issues are ironed out at that point, the standard-making process could be greatly shortened. For the business processes for health care, the ASC X12N suite of transaction standards was selected, and the terminologies already in use for this purpose were identified and required.

RanjanKumarratedititwasamazingJun05,Toshareandusedatafrommultiple Why not share! That EHR is created by aggregating and sharing data among all sites at which a patient receives care as well as data from the patient. Ed Hammond hammo mc. CloseFigureViewer.These rules were an important market lever for clearinghouses that would accept claims in the traditional format and translate the claims to meet HIPAA requirements.
